Embedding Evidence Into Practice
Case Study 1

Who:

Neonatal Consultant.

Research request:

Research support at ward rounds to help support decisions about safe patient care and evidence based practice of colleagues.

What we did:

Evidence Based Information Specialist Librarian attended ward rounds.

Discussed evidence requirements.

Carried out comprehensive literature searches and emailed relevant references directly to consultant.

Benefit and impact:

Saved valuable consultant time.

Improved patient care from a wide aspect because teaching is more evidence based.

Guidelines have been reviewed for the neonatal network.
