

KS Library and Knowledge Services
LKS Embedding Evidence Into Practice
L Case Study 5

Who:

Moving and Handling Lead for the Trust.

Research request:

Research support to help identify evidence base for writing a series of articles.

What we did:

Carried out a literature search of the clinical databases.

Contacts Dental Practice organisations to request guidelines.

Benefit and impact:

Provides reassurance that limited information on the topic is available, so saved valuable time continuing to search the evidence base.

Contributed to continuing professional development by providing support getting articles published.

Supports safe patient care by providing evidence to inform articles about manual handling best practice.
