

Updated Daily

New evidence is added to *DynaMed Plus* multiple times each day, ensuring you always have the most current information.

With *DynaMed Plus*, you can be assured you are receiving the most current evidence-based information. Our editors monitor the content of medical journals on a daily basis, evaluating each article for clinical relevance and scientific validity.

The new evidence is integrated with existing content, and overall conclusions are changed as appropriate, representing a synthesis of the best available evidence.

Read more about the *DynaMed Plus* [Evidence-based Methodology](#).

To view all Recent Updates, click the **View All** link. The list of Recent Updates includes the dates the topics were updated, as well as an explanations of the updates and a links to the updated topics.

The screenshot shows the DynaMed Plus website interface. At the top, there is a teal header with the text "DynaMed Plus" in white. Below the header is a white search bar with an orange "Search" button. The main content area is divided into two columns. The left column is titled "Spotlight" and contains several links: "Options for Mobile Access", "DynaMed's E-Newsletter Check it Out!", "Introduce Yourself to DynaMed's Editorial Team", "Direct Link to Lyme Disease Topic", "Search for lung", and "Thunderclap headache management". The right column is titled "Recent Updates" and has a red-bordered "View All" link next to it. Below the title, there are three update entries, each with a date and time, a brief description, and a topic link. The first entry is dated "Mar 16, 2015 5:04 PM" and discusses aspherical toric intraocular lenses. The second entry is dated "Mar 16, 2015 4:31 PM" and discusses irigosladine for small intestine mucosal injuries. The third entry is dated "Mar 16, 2015 4:09 PM" and discusses mutations in the sodium-dependent phosphate cotransporter 2c gene.
