Hoos waxaa ku yaala jaantus muujinaya heerarka karboon hal oksaydhka (CO) ee badqabka idii ah adiga iyo ilmahaaga.

Cabbirka CO-ga	Qabatinka/Balwad Ka Dhigashada	CO-ga Uurjiifka
0-4ppm	Qofka sigaarka cabbin, halkani waa meesha ugu fiican	1.46
5-6ppm	Aagga khatarta, nikotiinka balwad ka dhigasho ayaa laga yaabaa inay dhacdo	1.46 – 2.38
7-10ppm	Sigaar cabaha, balwad ka dhigashada nikotiinka ayaa dhacda, jimicsiga aasaasiga ah waxaa saamayn kara sigaarka	2.38
11-16ppm	sigaar cabbista joogtada ah, cabbirada muujinaya balwad ka dhigashada nikotiinka halista ah, heerarka waa 5jeer kan qofka sigaarka cabbin	3.40
17-25ppm	Qofka sigaarka balwada u yahay, unugyada dhiigaaga cas ayaa leh oksijiin yar marka loo eego inta jirku u baahan yahay, saamayn ayaa ku timaada caafimaadka	3.40 – 5.66
26-35ppm	Qofka aadka u cabbo sigaarka, heerkan waa mid aan caadi ahayn, waxyeello joogto ah iyo ku sumowga CO ayaa dhici kara	5.66
36-60ppm	Qofka halista ugu sarreysa ugu jira sigaar cabbista	5.66

Kadib 20 daqiqiyo	Cadaadiska dhiiggaaga iyo garaaca wadnahaaga ayaa caadi ku soo noqda. Wareegga dhiigga ayaa soo hagaaga - gaar ahaan gacmahaaga iyo cagaahaaga.
Kadib 8 saacadood	Heerarka nikotiinka iyo kaarboon hal oksaydhka ee dhiiga ayaa kala bar hoos u dhaca. Heerarka oksijiinta ayaa caadiku soo noqda
Kadib 24 saacadood	Kaarboon hal oksaydhka ayaa laga nadiifin doonaa jirka. Sambabadaadu waxay bilaabi doonaan inay nadiifiyaan xabka iyo wasakhda.
Kadib 48 saacadood	Jirkaagu hadda waa ka nadiif nikotiinka. Wuxaan ogaan doontaa sida dareenka dhadhankaaga iyo urtaada u soo hagaageen.
Kadib 72 saacadood	Neefsashadaadu waxay noqonaysaa mid sahan. Tamar badanayaad yeelanaysaa.
2 - 12 toddobaad gudahooda	Wareegga dhiigga ayaa hadda soo hagaagay guud ahaan jirkaaga oo dhan. Way kuu fudduhay inaad socoto oo jimicsato.
3-9 bilood gudahooda	Awooddha sambabadaadu ayaa soo hagaaga ilaa 5-10% waxaadna macsalaamayn kartaa qufaca, neef-yarida iyo hinraagida.
Kadib 5 sanno	Hadda waxaad ugu jirtaa kala bar fursad wadne qabad marka loo eego qofka sigaarka cabba.
Kadib 10 sanno	Fursadda aad ku qaadi karto kansarka sambabada waa kala bar mida qofka sigaarka cabba. Fursadda wadne qabadka waxay la mid tahay qofka aan weligiis sigaarka cabbin.

La qabsashada joojinta sigaar cabbista

Rabbitaanka sigaar cabbista: Maskaxda ayaa noqota midmaqan xilliga sixida nikotiinka. Tani waxay soconaysaa dhowr toddobaad oo keliya. Isku day inaad is mashquuliso.

Qufaca: Sambabka ayaa nadiif noqonayaan waxayna u dhici doontaa si degdeg ah. Cabbitaanada diiran ayaa fiican.

Gaajada: Dheef-shiidka kiimikaad ayaa isbeddelaya, unugyada dhadhanka ayaa soo hagaagaya. Cun miro iyo khudaar, calali xanjo aan sonkor lahayn oo cab biyo.

Calool-fadhiga ama shubanka: Jirka caadi ayuu ku soo noqonayaan. Cab biyo, cun miro, khudaar oo jimics. Booqo xirfadlaa daryeelka caafimaadka haddii ay sii socdaan.

Dhib ku qabida hurdada: Nikotiinka ka baxa jirka awgiis. Raagta ilaa 2-3 toddobaad. Iska yaree cabbida shaaha iyo kafeega. Jimics oo ha gasho hawo cusub sambabada.

Wareerka Oksijiin badan ayaa gala maskaxda. Karboon hal oksaydh yar. Tani ma sii socon doonto muddo-dheer.

Isbeddelada dareenka, feejignaan xummada iyo xanaaqa: Taageero wediiso qoyskaaga. Tani way dhammaan doontaa, qaado waqtii aad ku nasato.
